SOLUTIONS ENGINEER

SaaS Delivery, AWS & API Integrations · Client-facing

Systems Engineer with 4 years building and delivering web-based SaaS products to clients across legal, healthcare, fintech, education, and pharma sectors. Combine hands-on technical execution (AWS Lambda, API Gateway, IAM, REST APIs, Bubble.io) with client discovery, scope definition, and stakeholder management. Shipped an internal quoting tool that cut cycle time from 2h to 30min, a student travel platform that processed \$1M+ MXN in its first week, and most recently an inventory system (Next.js/TypeScript) now live in production. Targeting Solutions Engineer roles where both technical depth and client-facing skills are core to the work.

EXPERIENCE

Freelance Software Engineering

Jan 2026 – Present

Independent contractor delivering SaaS and internal systems for clients across legal and retail sectors

EC Rubio — Solutions Developer · Top 10 Mexican Law Firm

Jan 2026 – Present

- Designed and built EC Rubio's internal intranet, a Bubble.io PWA for a top 10 Mexican law firm (100+ attorneys, 8 offices). Phase 1 delivered: main dashboard, legal news and alerts feed with filters, attorney directory, marketing & onboarding document library, and admin control panel. Scoped for 500 firm-wide users at launch.
- Owned the full discovery cycle with firm leadership, interviewed stakeholders, identified core operational pain points, defined product scope, and selected the stack based on delivery timeline and complexity.
- Architected role-based access control across 3 user types (administrators, partners, attorneys) and modeled the relational data schema for news, legal alerts, attorney records, and document workflows.
- Acted as technical lead in a 3-person team, partnered with a UX designer (Figma) and a client-side product owner; owned all platform technical decisions.

Abryl — Internal Systems Developer · Multi-channel Retail

Apr 2026 – Present

- Designed and shipped Sentinel, an inventory management system built end-to-end (Next.js, TypeScript, Prisma), now live in production, managing a 20,500-SKU catalog (~40,000 units in stock) across 2 retail locations and an online sales channel.
- Conducted stakeholder discovery with the business owner, surfaced inventory reconciliation as the primary pain point after years of stock discrepancies, and scoped the system around it.
- Built XLS-based ingestion for sales and stock updates, query modules for sales, inventory, and movement history, and an operations dashboard with restock alerts, top sellers, and replenishment estimates, fully replacing the legacy spreadsheet workflow.

Konfront — Mexico City, Mexico

Jun 2022 – Apr 2026

Low-code SaaS development agency · 4-year tenure across 4 roles

Senior Technology Operations Engineer

Sep 2025 – Apr 2026

- Led delivery of Dentalia's internal SKU management portal, a Bubble.io web app synchronized with the client's Snowflake data warehouse via REST API, managing ~2,000 SKUs for 5 internal users.
- Architected AWS IAM access control across the company: 10 engineers grouped into 7 role-based permission sets following the principle of least privilege.
- Owned discovery calls, scope negotiation, and technical feasibility approval for new client engagements, translating business needs into delivery plans the team could execute.
- Mentored 7 junior and mid-level engineers on Bubble.io patterns, AWS integrations, and client-facing communication.

Technology Operations Engineer

Mar 2024 – Sep 2025

- Scoped and led delivery of Inventa's internal quoting tool, directed junior engineers on the Bubble.io build; tool replaced Excel-based workflows for ~10 sales and operations users, cutting per-quote cycle time from 2 hours to 30 minutes.
- Supervised development of Python-based AWS Lambda functions exposed through API Gateway, reviewed code, defined integration approach, and used CloudWatch for production observability.
- Ran client-facing technical discussions for assigned projects, discovery, demos, and scope tradeoffs.
- Oversaw troubleshooting and resolution of production issues across client platforms, logic errors, integration failures, and post-launch incidents.

Senior Technology Operations Analyst

Jul 2023 – Mar 2024

- Led delivery of Xcape, a Bubble.io-based travel planning platform for university students that processed over \$1M MXN in transactions during its first week and reached 5,000+ student users across multiple campuses.
- Onboarded and mentored the team's first junior engineer, establishing internal patterns for Bubble.io development, documentation, and code review.

- Stepped into a full client-owner role for assigned projects, leading discovery calls, gathering requirements, and prioritizing features with stakeholders.

Technology Operations Analyst

Jun 2022 – Jul 2023

- Built core screens and workflows for PrepaAnahuac's admissions platform using Bubble.io, including the candidate intake flow.
- Implemented webhook integration between the client's CRM and the Bubble.io database, processing 2,000+ candidate records as they were created on the source system.
- Began leading client calls and requirements discussions, first step into the client-facing track that became a core part of subsequent roles.

TECHNICAL SKILLS

Platforms & Cloud: Bubble.io (4 yrs, advanced), AWS Lambda, AWS API Gateway, AWS CloudWatch, AWS IAM

Integrations: REST APIs, Webhooks, Postman, Snowflake (REST-based integration)

Languages & Frameworks: JavaScript / TypeScript, Node.js, Next.js, Python, Prisma, Git

Delivery & Design: PWA delivery, role-based access control, least-privilege IAM design, technical scoping, client discovery & demos

EDUCATION

Bachelor's in Computer Systems Engineering

2016 – 2020

Universidad del Valle de México (UVM)

LANGUAGES

Spanish - Native · English - Professional working proficiency
